## FOR IMMEDIATE RELEASE

### iPods™ Ahoy !!

Announcing the All New **AQ-IP-3B**  
Waterproof Digital Media Center With A Twist!

Campbell, CA – June 24<sup>th</sup>, 2010 – The waterproof product experts at Aquatic AV have solved the entertainment challenge for the millions of iPod™ and MP3 owners that feel the call of the sea. The AQ-IP-3B from Aquatic AV is a marvel of waterproof entertainment and product design expertise. Boat manufacturers and after-market boat owners can now experience a true multi-environment stereo receiver and digital media center with the ONLY iPod Docking Unit on the market that is compatible with any size iPod™ without an adapter.

The AQ-IP-3B AM/FM/XM/Sirius/iPod® is an audio and digital media center with a unique twist – a protected “garage” for iPod® docking at sea. This stereo is manufactured with XM-Ready technology. The actual XM Mini Tuner and Home Dock are sold separately. The cartridge incorporates a Radio ID number for registration with XM Radio. Once the cartridge is activated with a subscription, the radio will receive XM and Sirius satellite signals.

The Home Dock is the dock that the cartridge plugs into. The IP-3B controls your iPod® with full navigation of all menus and is equipped with 2 auxiliary inputs for other MP3 players as well. The 4 X 50 watt amplifier delivers power to spare. The IP66 rating ensures protection against water, dust salt/fog and UV. Unlike other re-purposed car stereos that oxidize in moist environments, the IP-3B has a ZAM-coated Stainless Steel Chassis to protect from corrosion.

The conformal-coated circuit boards also have silicone added in critical areas to protect them from moisture. The mechanism meets commercial grade specifications of -20°C to 70°C. (most other third-party units only meet -10°C to 60°C degrees.)

The player features an LCD Dot Matrix display with 2-stage dimmer control, RCA inputs and 4-volt outputs. This unit includes a DSP (Digital Sound Processor) as well as sub-woofer output control. The special "Two Zone" capability enables listening to two different sources in two different zones at the same time. AQ-IP-3B is equipped with two 12-volt triggers on/off and four 5-volt triggers that are momentary and the AM/FM tuner has USA/Euro switchable frequency.

The AQ-IP-3B from Aquatic AV is manufactured in a black matte finish and is available now with a retail price of \$390.00.
